

Re-imagining the future, from concept to GNTX...

CHALLENGES 2015

INDUSTRY DOWNTURN

results in project delays or cancellation.

There were large scale workforce reductions and a loss of experienced engineers as they were switching industries or retiring early.

BIG IDEA 2017

RE-IMAGINING THE AUSTRALIAN WORKPLACE

where we all work together just as if we are one organisation, simplifying how we can:

- » Learn from each other using the wealth of under-utilised best practices.
- » Access the diversity of experience and expertise in different industries.
- » Build and refine tools, processes, procedures and strategies.

BUILDING 2018

**REFINING, CONSULTING
AND VALIDATING**
the concept with stakeholders.

CREATING THE FIRST

interactive platform where members can buy, sell or download for free, best practice tools, expertise and information.

LEAN START-UP
approach of development and in-market piloting with customers.

DELIVERING 2019

SET TO SHIFTING MINDSETS

by demonstrating how being part of this collaborative approach could benefit all areas of industry.

CUSTOMERS DESERVE MORE

has always been our belief and GNTX is another one of our innovations delivering on this commitment.

...access the best
